INTRODUCTION

The UACS MFO/PAP Code has been expanded to include Sector Outcomes and Horizontal Outcomes. The Sector Outcomes are utilizing the OECD/UN Classifications of Functions of Government (COFOG) sector and sub-sectors. The sector outcomes in UACS are intended to provide the means to capture information at an aggregated level on government expenditures. This is intended to be utilized for budget formulation, budget preparation, expenditures, and reporting. This will significantly improve the information needed for setting budget priorities and budget analysis.

The Department of Management and Budget (DBM) has completed the initial pilot for the utilization of the UACS Sector Outcome (COFOG) using the FY 2015 National Expenditure Program (NEP) submitted to Congress as the basis. The pilot was conducted using the individual Program / Activity / Project (PAP) and mapping the over 28,000 PAPs to the appropriate UACS Sector Outcome (COFOG) Sub-Sector (COFOG Group Level). This is the actual data from the NEP. This mapping data was then uploaded to the DBM BPMS System for compilation, reconciliation, aggregation, and reporting. This report provides the results of the aggregation of the FY 2015 NEP for purposes of demonstrating the information to the management of the DBM. The information then can be utilized by DBM to gain an understanding of the budget and then analyze the information for budget formulation, priorities, fiscal space and preparation.

The information from the sector outcome is presented in several different formats in this report to obtain a better understanding of the results. These include:

- An overall breakdown of the NEP by Sector. These are shown in Section 1 of this Report. This is the highest level view of the entire budget. Additionally, as requested there are some further views as follows:
 - Included as a separate item is the General Administrative Cost as compared to the overall budget. The General Administrative Cost is 12.08% of the overall budget.
 - Also included is a separate item for the overall Research and Development (R&D) Cost compiled from all sectors to give an overall R&D cost, which is 0.355% of the overall budget.
 - Additionally there is the breakdown of Conflict Affected Areas cost by Department, which is 1.03% of the overall budget.
- An overall breakdown of the NEP by Sub-Sector within each Sector. These are shown in Section 2 of this Report.
- A breakdown for each Department (including attached agencies) showing two views. These are shown in Section 3 of this Report.
 - The first view is each Department by Sector.
 - The second view is each Department by Sub-Sector.
- An overall breakdown for each Sector by Department. These are shown in Section 4 of this Report.

- An overall Breakdown for each Sub-Sector by Department. These are shown in Section 5 of this Report.

There are separate views of each of these. Each of these views includes a pie chart for easy viewing, a table of the amounts (in thousands of Pesos), the % of the amount, and the overall % in relation to the overall proposed budget (% of P2.606 Trillion).

The mapping of each of the UACS MFO/PAP Codes (all codes all Departments) to the UACS Sector Outcome (COFOG) was initially completed by the UACS Team and then it was validated and revalidated with each of the respective BMBs. The data is considered to be accurate and reliable and based upon the definitions as prescribed by the United Nations COFOG.

This should be considered as just an initial view of the information to address the common type information that is likely needed by many. This information can be presented in many other ways and formats. The Department should consider obtaining a software tool that could be utilized for analyzing the data further for the specific purposes needed by everyone in the Department. The data is currently kept in several databases. The budget data is kept in the BPMS, budget execution is in eBudget, and expenditures are planned to be in the URS System. This data can be extracted from each of these systems to obtain this information as needed. The DBM should also consider having a data warehouse for easier utilization of the information.

Upon approval of the GAA, the UACS MFO/PAP codes should be updated with the sector outcome codes to reflect the approved budget, as there will likely be some changes due to the insertions and changes by Congress. These same reports (plus any others desired) should be generated to give the same information based upon the approved budget. The requirements for inclusion of this information in the FY 2016 Budget Call are already underway.

This information would also be very useful for expenditure information. The recent COA-DBM-DOF Joint Circular 2014-1 requires all agencies to begin utilizing the UACS Sector Outcome codes beginning January 1, 2015. This will facilitate the capturing of this data in agencies in the BFAR Reports. It should be noted that agencies will require specific detailed training for the UACS Sector Outcome as they do not have understanding of the codes and their meanings, and how to apply this. The quality of the information that is planned to be provided by agencies would be greatly enhanced once this training is provided.

The current definitions of the UACS Sub-Sectors are included in Annex A of this Report for information. These definitions are the international definitions. The DBM is intending on refining these definitions to be more specific to the Philippines. Overall, considerable progress is being made with the implementation of the UACS Sector Outcome (COFOG). These efforts should continue for the proper and successful full implementation.

SECTION 1 - SECTOR ALLOCATION OF THE NATIONAL BUDGET

The 2015 National Budget of the Philippine Government as proposed to Congress in the National Expenditure Program (NEP) amounted to P2.606 Trillion which was broken down into several sectors. The highest percentage of the budget was given to the General Public Services (Code: 100) which was approximately 43.71% of the total budget. The least amount was allocated to the Environmental Protection (Code: 180) which was equivalent to 0.19% of the total National Budget.

The rest of the breakdown can be seen on the table below, please note that all amounts are shown in thousands of Pesos.

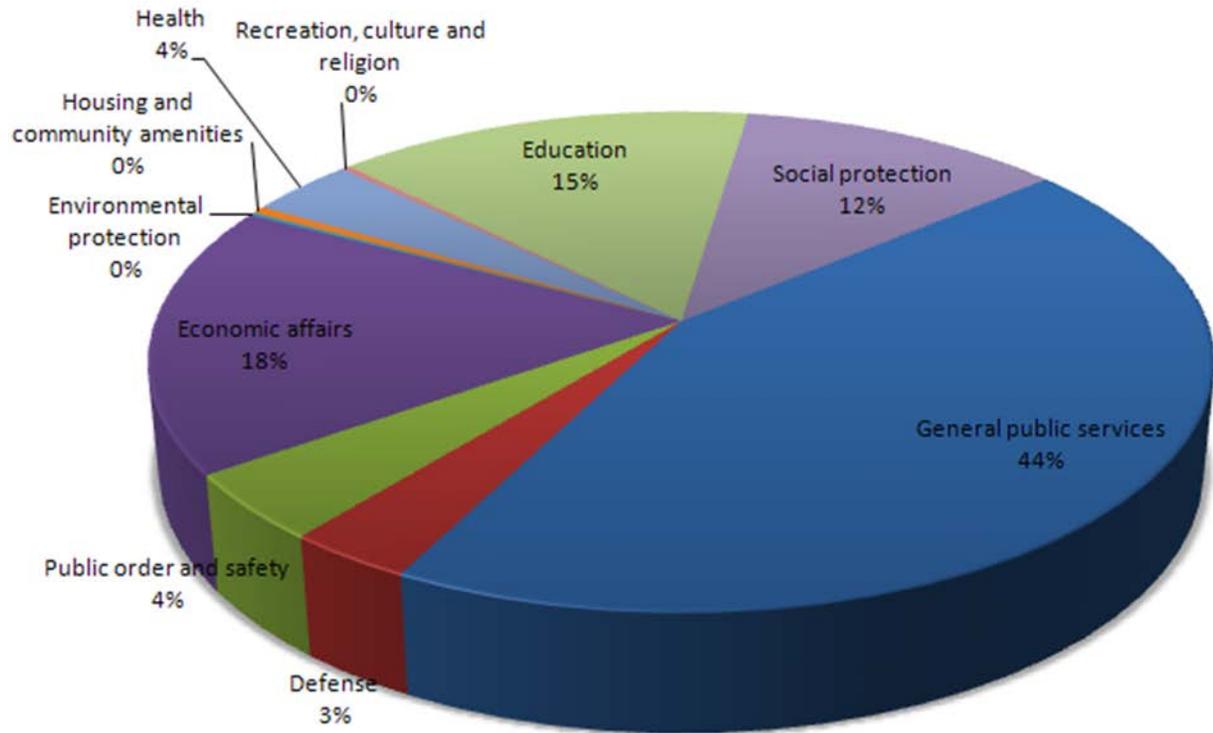

CODE	SECTOR	AMOUNT (in Thousands)	% (Budget)
100	General public services	1,137,961,851.00	43.67%
120	Defense	87,374,991.00	3.35%
140	Public order and safety	113,795,895.00	4.37%
160	Economic affairs	456,167,028.00	17.50%
180	Environmental protection	4,948,026.00	0.19%
200	Housing and community amenities	12,632,213.00	0.48%
220	Health	98,838,138.00	3.79%
240	Recreation and Culture	7,469,234.00	0.29%
260	Education	386,402,585.00	14.83%
280	Social protection	300,410,039.00	11.53%
	TOTAL	2,606,000,000.00	100.00%

The sectors of Economic Affairs (Code 160), Education (Code 260), Social Protection (Code 280) and Public Order and Safety (Code 140) comprise the Top 5 Sectors with the greatest budget allocation. The total amount from those sectors alone would be more than 90% of the National Budget, which makes the Bottom 5 Sectors to accumulate less than 10% of the budget.

The following Table shows the breakdown of the budget by Sector, in order of highest to lowest of budget allocation:

CODE	SECTOR	AMOUNT (in Thousands)	% (Budget)
100	General public services	1,137,961,851.00	43.67%
160	Economic affairs	456,167,028.00	17.50%
260	Education	386,402,585.00	14.83%
280	Social protection	300,410,039.00	11.53%
140	Public order and safety	113,795,895.00	4.37%
220	Health	98,838,138.00	3.79%

SECTION 2 – SUB-SECTOR ALLOCATION OF THE NATIONAL BUDGET

This section provides the breakdown of the FY 2015 National Budget by Sub-Sector. This is presented within each Sector Outcome category.

100: GENERAL PUBLIC SERVICES

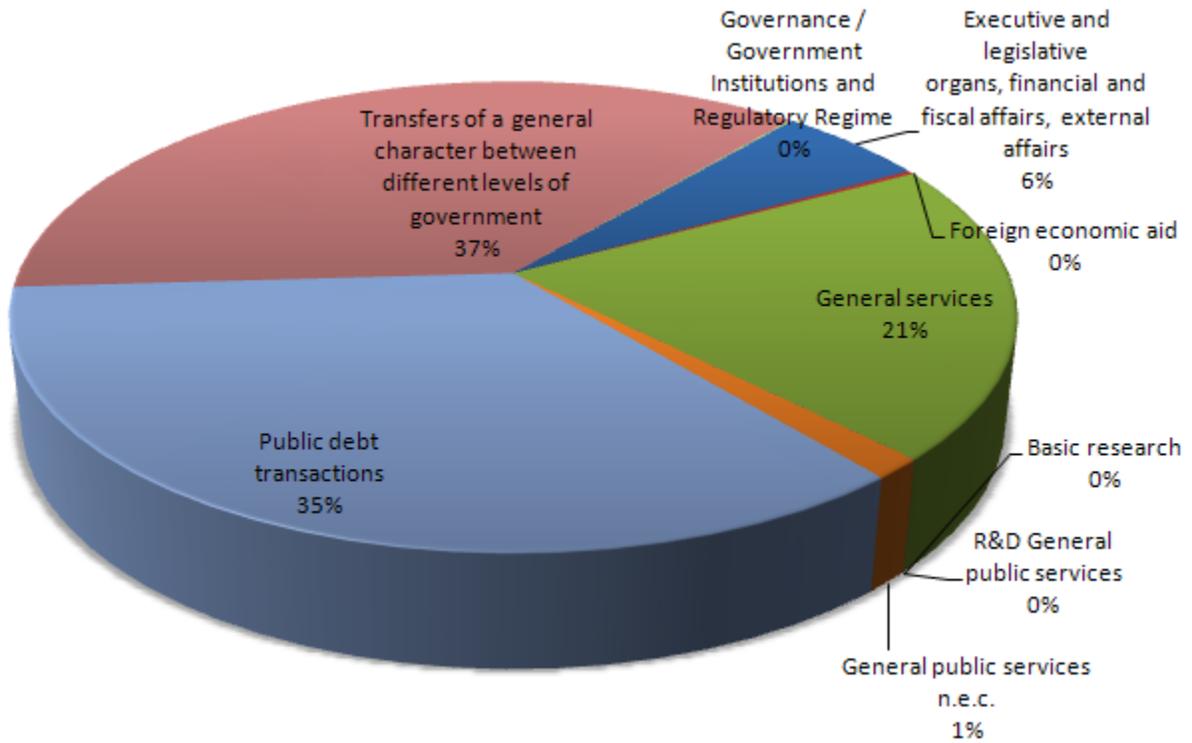

General Public Services received the largest budget allocation, which is 43.7% of the total budget. This amounts to over P1.13T. The table below shows the Sub-Sector, the amount (in Thousands of Pesos), the % that each Sub-Sector is in relation to the Sector (General Public Services) and also the % of the overall government budget.

The 3 largest shares of this sector are Transfers between different levels of government (IRA to LGUs), which is 36.99% of the sector, or 16.15% of the overall budget, the public debt transactions (Debt Service), which is 35.09% of the sector, or 15.32% of the overall budget, and the General Services (mostly GAS of all agencies), which is 20.43% of the sector, or 8.92% of the overall budget. Details of the budget allocation with corresponding amounts and percentages are shown on the table below and the chart on the following page.

260: EDUCATION

The Education Sector was among the highest recipient of budget allocation with P386.4 billion, or 14.83% of National Budget. It should be noted that this sector includes several Departments including the Department of Education (DepEd) and other Departments. The details by Department are shown in Section 3 of this report. DepEd received the largest budget allocation of all Departments, with P339.288 billion, or 13.019% of the overall budget.

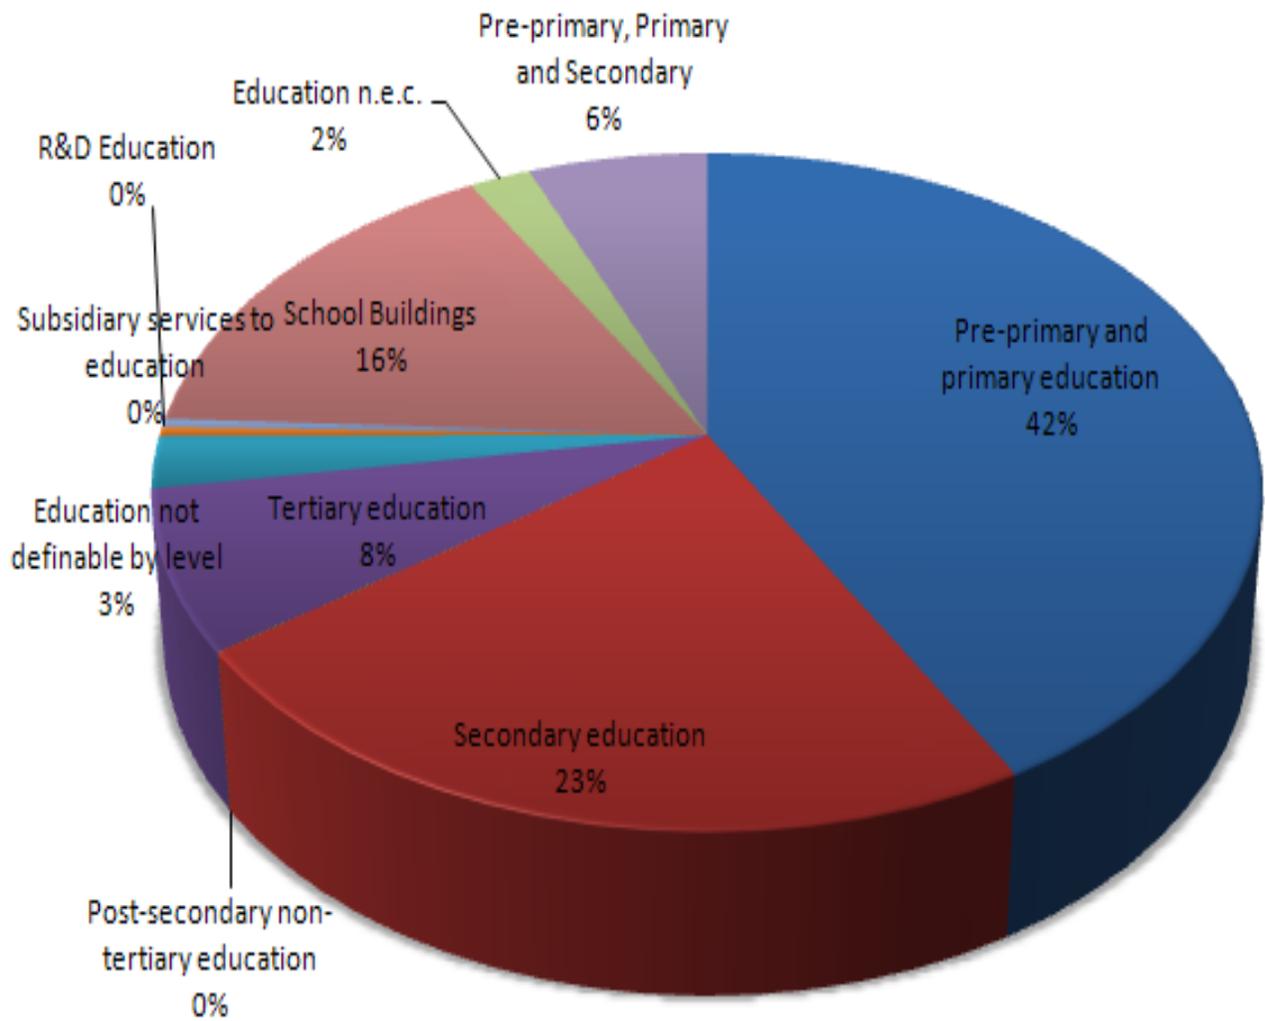

In the Education Sector the Pre-primary, Primary, and Secondary Education received the largest allocation. There are 3 sub sectors for this, being (261) Pre-Primary and Primary Education, (262) Secondary Education, and the combined (270) Pre-primary, Primary, and Secondary Education. The combined sub-sector (270) was added as there numerous items with material amounts in the budget which cannot be distinguished between Preprimary-Primary and Secondary, and it is intended for both. The 3 sub-sectors are 71.01% of the Education Sector, or 10.53% of the overall budget. The other major sub-sectors in education are School Buildings with 16.96% of the sector, or 2.37% of the overall budget, and Tertiary Education with 7.57% of the sector, or 1.12% of the overall national budget.

The following table and chart shows the breakdown of the Education Sector by Sub-Sector:

ANNEX A - UACS SECTOR OUTCOME DESCRIPTIONS (COFOG)

Introduction

The Department of Budget and Management (DBM), the Commission on Audit (COA), and Department of Finance (DOF) developed and adopted the UACS Coding Structure through Joint Circular 2013-1 dated August 6, 2013. This coding structure is in the process of being enhanced to include the Sector Outcome as part of the UACS MFO/PAP Code to provide the ability to identify the sector information for budget and expenditure. The sector outcome adopted by DBM, COA, and DOF is the international standard Classifications of Functions of Government (COFOG), with some minor additions that are specific to the government's needs. The COFOG is used by the Organization for Economic Cooperation and Development (OECD), United Nations (UN), International Monetary Fund (IMF), and others. This COFOG is also consistent with the already adopted Government Finance Statistics (GFS) required by the IMF, which will facilitate the required finance statistics reporting by the Bureau of Treasury. This will provide the ability to track budgets and expenditures to the sector outcomes.

The UACS MFO/PAP Code has been expanded to include Sector Outcomes to accomplish this. The sector outcomes in UACS are intended to provide the means to capture information at an aggregated level. This is intended to be utilized for budget formulation, budget preparation, expenditures, and reporting. This is will significantly improve the information needed for setting budget priorities and budget analysis.

The UACS MFO/PAP codes for Sector Outcomes are in the process of being implemented. This manual is intended to provide guidance on selection of the proper sector outcome code value. This manual is mainly from the United Nations descriptions of the COFOG and adopted for the DBM, COA, DOF UACS code values utilized.

The Business rules that are required to be followed are that the Sector Code shall not be utilized, these are intended as headings. Only the Sub-Sector Code shall be utilized. All MFO/PAPs are required to have Sub-Sector Outcome Code Value.

- Operation or support of reforestation work, pest and disease control, forest fire-fighting and fire prevention services and extension services to forest operators;
- Production and dissemination of general information, technical documentation and statistics on forestry affairs and services;
- Grants, loans or subsidies to support commercial forest activities.
- Includes: forest crops in addition to timber.

This sub-sector covers both commercial fishing and hunting, and fishing and hunting for sport. The fishing and hunting affairs and services listed below refer to activities that take place outside natural parks and reserves.

- Administration of fishing and hunting affairs and services; protection, propagation and rationalized exploitation of fish and wildlife stocks; supervision and regulation of freshwater fishing, coastal fishing, ocean fishing, fish farming, wildlife hunting and issuance of fishing and hunting licenses;
- Operation or support of fish hatcheries, extension services, stocking or culling activities, etc.;
- Production and dissemination of general information, technical documentation and statistics on fishing and hunting affairs and services;
- Grants, loans or subsidies to support commercial fishing and hunting activities, including the construction or operation of fish hatcheries.

Excludes: multi-purpose development projects (167); control of offshore and ocean fishing (141); administration, operation or support of natural parks and reserves (184).

Sub-sector 163 - Fuel and energy

This sub-sector covers coal of all grades, lignite and peat irrespective of the method used in their extraction or beneficiation and the conversion of these fuels to other forms such as coke or gas.

- Administration of solid mineral fuel affairs and services; conservation, discovery, development and rationalized exploitation of solid mineral fuel resources; supervision and regulation of the extraction, processing, distribution and use of solid mineral fuels;
- Production and dissemination of general information, technical documentation and statistics on solid mineral fuel affairs and services;
- Grants, loans or subsidies to support the solid mineral fuel industry and the coke, briquette or manufactured gas industries.

This sub-sector covers natural gas, liquefied petroleum gases and refinery gases, oil from wells or other sources such as shale or tar sands and the distribution of town gas regardless of its composition.

- Administration of petroleum and natural gas affairs and services; conservation, discovery, development and rationalized exploitation of petroleum and natural gas resources; supervision and regulation of the extraction, processing, distribution and use of petroleum and natural gas;
- Production and dissemination of general information, technical documentation and statistics on petroleum and natural gas affairs and services;
- Grants, loans or subsidies to support the petroleum extraction industry and the industry refining crude petroleum and related liquid and gaseous products.

Administration of nuclear fuel affairs and services; conservation, discovery, development and rationalized exploitation of nuclear material resources; supervision and regulation of the extraction and processing of nuclear fuel materials and of the manufacture, distribution and use of nuclear fuel elements;

- Production and dissemination of general information, technical documentation and statistics on nuclear fuel affairs and services;
- Grants, loans or subsidies to support the nuclear materials mining industry and the industries processing such materials.

Administration of affairs and services involving fuels such as alcohol, wood and wood wastes, bagasse and other non-commercial fuels;

- Production and dissemination of general information, technical documentation and statistics on availability, production and utilization of such fuels;
- Grants, loans or subsidies to promote the use of such fuels for the production of energy.

This sub-sector covers both traditional sources of electricity such as thermal or hydro supplies and newer sources such as wind or solar heat.

- Administration of electricity affairs and services; conservation, development and rationalized exploitation of electricity supplies; supervision and regulation of the generation, transmission and distribution of electricity;
- Construction or operation of non-enterprise-type electricity supply systems;
- Production and dissemination of general information, technical documentation and statistics on electricity affairs and services;

- Grants, loans or subsidies to support the electricity supply industry, including such outlays for the construction of dams and other works designed chiefly to provide electricity.

Administration of non-electric energy affairs and services which chiefly concern the production, distribution and utilization of heat in the form of steam, hot water or hot air;

- Construction or operation of non-enterprise-type systems supplying non-electric energy;
- Production and dissemination of general information, technical documentation and statistics on availability, production and utilization of non-electric energy;
- Grants, loans or subsidies to promote the use of non-electric energy.
- Includes: geothermal resources; non-electric energy produced by wind or solar heat.

Excludes: solid mineral fuel transportation affairs (classified to the appropriate sub-sector of 165); petroleum or gas transportation affairs (classified to the appropriate sub-sector of 165); nuclear fuel transportation affairs (classified to the appropriate sub-sector of 165); disposal of radioactive wastes (181); forest management (162); wind and solar heat (163); geothermal resources (163); non-electric energy produced by wind or solar heat (163).

Sub-sector 164 - Mining, manufacturing and construction

This class covers metal-bearing minerals, sand, clay, stone, chemical and fertilizer minerals, salt, gemstones, asbestos, gypsum, etc.

- Administration of mining and mineral resource affairs and services; conservation, discovery, development and rationalized exploitation of mineral resources; supervision and regulation of prospecting, mining, marketing and other aspects of mineral production;
- Production and dissemination of general information, technical documentation and statistics on mining and mineral resource affairs and services;
- Grants, loans or subsidies to support commercial mining activities.
- Includes: issuance of licenses and leases, regulation of production rates, inspection of mines for conformity to safety regulations, etc.

Administration of manufacturing affairs and services; development, expansion or improvement of manufacturing; supervision and regulation of the establishment and operation of manufacturing plants; liaison with manufacturers' associations and other organizations interested in manufacturing affairs and services;

- Production and dissemination of general information, technical documentation and statistics on manufacturing activities and manufactured products;
- Grants, loans or subsidies to support manufacturing enterprises.
- Includes: inspection of manufacturing premises for conformity with safety regulations, protection of consumers against dangerous products, etc.

Administration of construction affairs and services; supervision of the construction industry; development and regulation of construction standards;

- Production and dissemination of general information, technical documentation and statistics on construction affairs and services.
- Includes: issuance of certificates permitting occupancy, inspection of construction sites for conformity with safety regulations, etc.

Excludes: coal and other solid fuels (163), petroleum and natural gas (163) and nuclear fuel materials (163); affairs and services concerning the coal processing industry (163), the petroleum refinery industry (163) or the nuclear fuel industry (163); grants, loans and subsidies for the construction of housing, industrial buildings, streets, public utilities, cultural facilities, etc. (classified according to function); development and regulation of housing standards (201).

Sub-sector 165 – Transport

Administration of affairs and services concerning operation, use, construction and maintenance of road transport systems and facilities (roads, bridges, tunnels, parking facilities, bus terminals, etc.);

- Supervision and regulation of road users (vehicle and driver licensing, vehicle safety inspection, size and load specifications for passenger and freight road transport, regulation of hours of work of bus, coach and lorry drivers, etc.), of road transport system operations (granting of franchises, approval of freight tariffs and passenger fares and of hours and frequency of service, etc.) and of road construction and maintenance;
- Construction or operation of non-enterprise-type road transport systems and facilities;
- Production and dissemination of general information, technical documentation and statistics on road transport system operations and on road construction activities;
- Grants, loans or subsidies to support the operation, construction, maintenance or upgrading of road transport systems and facilities.
- Includes: highways, urban roads, streets, bicycle paths and footpaths.

Administration of affairs and services concerning operation, use, construction and maintenance of inland, coastal and ocean water transport systems and facilities (harbors, docks, navigation aids and equipment, canals, bridges, tunnels, channels, breakwaters, piers, wharves, terminals, etc.);

- Supervision and regulation of water transport users (registration, licensing and inspection of vessels and crews, regulations concerning passenger safety and freight security, etc.), of water transport system operations (granting of franchises, approval of freight tariffs and passenger fares and of hours and frequency of service, etc.) and of water transport facility construction and maintenance;
- Construction or operation of non-enterprise-type water transport systems and facilities (such as ferries);

- Production and dissemination of general information, technical documentation and statistics on water transport system operations and on water transport facility construction activities;
- Grants, loans or subsidies to support the operation, construction, maintenance or upgrading of water transport systems and facilities.
- Includes: radio and satellite navigation aids; emergency rescue and towing services.

Administration of affairs and services concerning operation, use, construction or maintenance of railway transport systems and facilities (railway roadbeds, terminals, tunnels, bridges, embankments, cuttings, etc.);

- Supervision and regulation of railway users (rolling stock condition, roadbed stability, passenger safety, security of freight, etc.), of railway transport system operations (granting of franchises, approval of freight tariffs and passenger fares and of hours and frequency of service, etc.) and of railway construction and maintenance;
- Construction or operation of non-enterprise-type railway transport systems and facilities;
- Production and dissemination of general information, technical documentation and statistics on railway transport system operations and on railway construction activities;
- Grants, loans or subsidies to support the operation, construction, maintenance or upgrading of railway transport systems and facilities.
- Includes: long-line and interurban railway transport systems, urban rapid transit railway transport systems and street railway transport systems; acquisition and maintenance of rolling stock.

Administration of affairs and services concerning operation, use, construction and maintenance of air transport systems and facilities (airports, runways, terminals, hangars, navigation aids and equipment, air control amenities, etc.);

- Supervision and regulation of air transport users (registration, licensing and inspection of aircraft, pilots, crews, ground crews, regulations concerning passenger safety, investigation of air transport accidents, etc.), of air transport system operations (allocation of routes, approval of freight tariffs and passenger fares and of frequency and levels of service, etc.) and of air transport facility construction and maintenance;
- Construction or operation of non-enterprise-type public air transport services and facilities;
- Production and dissemination of general information, technical documentation and statistics on air transport system operations and on air transport facility construction;
- Grants, loans or subsidies to support the operation, construction, maintenance or upgrading of air transport systems and facilities.
- Includes: radio and satellite navigation aids; emergency rescue services; scheduled and non-scheduled freight and passenger services; regulation and control of flying by private individuals.

Administration of affairs and services concerning operation, use, construction and maintenance of pipeline and other transport systems (funiculars, cable cars, chairlifts, etc.);

- Supervision and regulation of users of pipeline and other transport systems (registration, licensing, inspection of equipment, operator skills and training; safety standards, etc.); of pipeline and other transport systems operations (granting of franchises, setting tariffs, frequency and levels of service, etc.) and of pipeline and other transport systems construction and maintenance;
- Construction or operation of non-enterprise-type pipeline and other transport systems;
- Production and dissemination of general information, technical documentation and statistics on the operation and construction of pipeline and other transport systems;
- Grants, loans or subsidies to support the operation, construction, maintenance or upgrading of pipeline and other transport systems.

Excludes: road traffic control (141); grants, loans and subsidies to road vehicle manufacturers (164); street cleaning (181); construction of noise embankments, hedges and other anti-noise facilities including the resurfacing of sections of urban highways and railways with noise reducing surfaces (183); street lighting (204); grants, loans and subsidies to shipbuilders (164); grants, loans and subsidies to rolling stock manufacturers (164); grants, loans and subsidies to aircraft manufacturers (164).

Sub-sector 166 – Communication

Administration of affairs and services concerning construction, extension, improvement, operation and maintenance of communication systems (postal, telephone, telegraph, wireless and satellite communication systems);

- Regulation of communication system operations (granting of franchises; assignment of frequencies, specification of markets to be served and tariffs to be charged, etc.);
- Production and dissemination of general information, technical documentation and statistics on communication affairs and services;
- Grants, loans or subsidies to support the construction, operation, maintenance or upgrading of communication systems.

Excludes: radio and satellite navigation aids for water transport (165) and air transport (165); radio and television broadcasting systems (243).

Sub-sector 167 - Other industries

Administration of affairs and services concerning the distributive trade and the storage and warehousing industry;

- Supervision and regulation of wholesale and retail trade (licensing, sales practices, labeling of packaged food and other goods intended for household consumption, inspection of scales and other weighing machines, etc.) and of the storage and

warehousing industry (including licensing and control of government-bonded warehouses, etc.);

- Administration of price control and rationing schemes operating through retailers or wholesalers regardless of the type of goods involved or intended consumer; administration and provision of food and other such subsidies to the general public;
- Production and dissemination of information to the trade and to the public on prices, on the availability of goods and on other aspects of the distributive trade and the storage and warehousing industry; compilation and publication of statistics on the distributive trade and the storage and warehousing industry;
- Grants, loans or subsidies to support the distributive trade and to the storage and warehousing industry.

Administration of affairs and services concerning construction, extension, improvement, operation and maintenance of hotels and restaurants;

- Supervision and regulation of hotel and restaurant operations (regulations governing prices, cleanliness and sales practices, hotel and restaurant licensing, etc.);
- Production and dissemination of general information, technical documentation and statistics on hotel and restaurant affairs and services;
- Grants, loans or subsidies to support the construction, operation, maintenance or upgrading of hotels and restaurants.

Administration of tourism affairs and services; promotion and development of tourism; liaison with the transport, hotel and restaurant industries and other industries benefiting from the presence of tourists;

- Operation of tourist offices at home and abroad, etc.; organization of advertising campaigns, including the production and dissemination of promotional literature and the like;
- Compilation and publication of statistics on tourism.

Multi-purpose development projects typically consist of integrated facilities for generation of power, flood control, irrigation, navigation and recreation.

- Administration of affairs and services concerning construction, extension, improvement, operation and maintenance of multi-purpose projects;
- Production and dissemination of general information, technical documentation and statistics on multi-purpose development project affairs and services;
- Grants, loans or subsidies to support the construction, operation, maintenance or upgrading of multi-purpose development projects;

Excludes: administration of price and other controls applied to the producer (classified according to function); food and other such subsidies applicable to particular population groups or individuals (280); projects with one main function and other functions that are secondary (classified according to main function).

Sub-sector 168 - R&D Economic affairs

Administration and operation of government agencies engaged in applied research and experimental development related to general economic, commercial and labor affairs;

- Grants, loans or subsidies to support applied research and experimental development related to general economic, commercial and labor affairs undertaken by non-government bodies such as research institutes and universities.

Administration and operation of government agencies engaged in applied research and experimental development related to agriculture, forestry, fishing and hunting;

- Grants, loans or subsidies to support applied research and experimental development related to agriculture, forestry, fishing and hunting undertaken by non-government bodies such as research institutes and universities.

Administration and operation of government agencies engaged in applied research and experimental development related to fuel and energy;

- Grants, loans or subsidies to support applied research and experimental development related to fuel and energy undertaken by non-government bodies such as research institutes and universities.

Administration and operation of government agencies engaged in applied research and experimental development related to mining, manufacturing and construction;

- Grants, loans or subsidies to support applied research and experimental development related to mining, manufacturing and construction undertaken by non-government bodies such as research institutes and universities.

Administration and operation of government agencies engaged in applied research and experimental development related to transport;

- Grants, loans or subsidies to support applied research and experimental development related to transport undertaken by non-government bodies such as research institutes and universities.

Administration and operation of government agencies engaged in applied research and experimental development related to communication;

- Grants, loans or subsidies to support applied research and experimental development related to communication undertaken by non-government bodies such as research institutes and universities.

Administration and operation of government agencies engaged in applied research and experimental development related to other sectors;

- Grants, loans or subsidies to support applied research and experimental development related to other sectors undertaken by non-government bodies such as research institutes and universities.

- Includes: distributive trades, storage and warehousing; hotels and restaurants; tourism and multi-purpose development projects.

Excludes: basic research (104).

Sub-sector 169 - Economic affairs n.e.c.

Administration, operation or support activities relating to general and sectoral economic affairs that cannot be assigned to (161), (162), (163), (164), (165), (166), (167) or (168).

Note: n.e.c. is Not Elsewhere Classified

Sector 180 - Environmental protection

The breakdown of environmental protection is based upon the Classification of Environmental Protection Activities (CEPA) as elaborated in the European System for the Collection of Economic Information on the Environment (SERIEE) of the Statistical Office of the European Communities (Eurostat).

Sub-sector 181 - Waste management

Administration, supervision, inspection, operation or support of waste collection, treatment and disposal systems;

- Grants, loans or subsidies to support the operation, construction, maintenance or upgrading of such systems.
- Includes: collection, treatment and disposal of nuclear waste.

Sub-sector 182 - Waste water management

Administration, supervision, inspection, operation or support of sewage systems and waste water treatment;

- Grants, loans or subsidies to support the operation, construction, maintenance or upgrading of such systems.

Sub-sector 183 - Pollution abatement

This group covers activities relating to ambient air and climate protection, soil and groundwater protection, noise and vibration abatement and protection against radiation.

- These activities include construction, maintenance and operation of monitoring systems and stations (other than weather stations); construction of noise embankments, hedges and other anti-noise facilities including the resurfacing of sections of urban highways or railways with noise reducing surfaces; measures to clean pollution in water bodies; measures to control or prevent the emissions of greenhouse gases and pollutants that adversely affect the quality of the air; construction, maintenance and operation of

installations for the decontamination of polluted soils and for the storage of pollutant products; transportation of pollutant products.

Sub-sector 184 - Protection of biodiversity and landscape

This group covers activities relating to the protection of fauna and flora species (including the reintroduction of extinct species and the recovery of species menaced by extinction), the protection of habitats (including the management of natural parks and reserves) and the protection of landscapes for their aesthetic values (including the reshaping of damaged landscapes for the purpose of strengthening their aesthetic value and the rehabilitation of abandoned mines and quarry sites).

Sub-sector 185 - R&D Environmental protection

Administration and operation of government agencies engaged in applied research and experimental development related to environmental protection;

- Grants, loans or subsidies to support applied research and experimental development related to environmental protection undertaken by non-government bodies such as research institutes and universities.

Excludes: basic research (104).

Sub-sector 186 - Environmental protection n.e.c.

Administration, management, regulation, supervision, operation and support of activities such as formulation, administration, coordination and monitoring of overall policies, plans, programmes and budgets for the promotion of environmental protection; preparation and enforcement of legislation and standards for the provision of environmental protection services; production and dissemination of general information, technical documentation and statistics on environmental protection.

- Includes: environmental protection affairs and services that cannot be assigned to (181), (182), (183), (184) or (185).

Note: n.e.c. is Not Elsewhere Classified

Sector 200- Housing and community amenities

Sub-sector 201 - Housing development

Administration of housing development affairs and services; promotion, monitoring and evaluation of housing development activities whether or not the activities are under the auspices of public authorities; development and regulation of housing standards;

- Slum clearance related to provision of housing; acquisition of land needed for construction of dwellings; construction or purchase and remodeling of dwelling units for the general public or for people with special needs;
- Production and dissemination of public information, technical documentation and statistics on housing development affairs and services;
- Grants, loans or subsidies to support the expansion, improvement or maintenance of the housing stock.

Excludes: development and regulation of construction standards (164); cash benefits and benefits in kind to help households meet the cost of housing (286).

Sub-sector 202 - Community development

Administration of community development affairs and services; administration of zoning laws and land-use and building regulations;

- Planning of new communities or of rehabilitated communities; planning the improvement and development of facilities such as housing, industry, public utilities, health, education, culture, recreation, etc. for communities; preparation of schemes for financing planned developments;
- Production and dissemination of general information, technical documentation and statistics on community development affairs and services.

Excludes: plan implementation, that is, the actual construction of housing, industrial buildings, streets, public utilities, cultural facilities, etc. (classified according to function); agrarian reform and land resettlement (162); administration of construction standards (164) and housing standards (201).

Sub-sector 203 - Water supply

Administration of water supply affairs; assessment of future needs and determination of availability in terms of such assessment; supervision and regulation of all facets of potable water supply including water purity, price and quantity controls;

- Construction or operation of non-enterprise-type of water supply systems;
- Production and dissemination of general information, technical documentation and statistics on water supply affairs and services;
- Grants, loans or subsidies to support the operation, construction, maintenance or upgrading of water supply systems.

Excludes: irrigation systems (162); multi-purpose projects (167); collection and treatment of waste water (182).

Sub-sector 204 - Street lighting

Administration of street lighting affairs; development and regulation of street lighting standards;

- Installation, operation, maintenance, upgrading, etc. of street lighting.

Excludes: lighting affairs and services associated with the construction and operation of highways (165).

Sub-sector 205 - R&D Housing and community amenities

Administration and operation of government agencies engaged in applied research and experimental development related to housing and community amenities;

Grants, loans or subsidies to support applied research and experimental development related to housing and community amenities undertaken by non-government bodies such as research institutes and universities.

Excludes: basic research (104); applied research and experimental development into construction methods or materials (168).

Sub-sector 206 - Housing and community amenities n.e.c.

Administration, operation or support of activities such as formulation, administration, coordination and monitoring of overall policies, plans, programmes and budgets relating to housing and community amenities; preparation and enforcement of legislation and standards relating to housing and community amenities; production and dissemination of general information, technical documentation and statistics relating to housing and community amenities.

- Includes: administration, operation or support activities relating to housing and community amenities that cannot be assigned to (201), (202), (203), (204) or (205).

Note: n.e.c. is Not Elsewhere Classified

Sector 220 – Health

Sub-sector 221 - Medical products, appliances and equipment

This group covers medicaments, prostheses, medical appliances and equipment and other health-related products obtained by individuals or households, either with or without a prescription, usually from dispensing chemists, pharmacists or medical equipment suppliers. They are intended for consumption or use outside a health facility or institution. Such products supplied directly to outpatients by medical, dental and paramedical practitioners or to in-patients by hospitals and the like are included in outpatient services (222) or hospital services (223).

Provision of pharmaceutical products such as medicinal preparations, medicinal drugs, patent medicines, serums and vaccines, vitamins and minerals, cod liver oil and halibut liver oil, oral contraceptives;

- Administration, operation or support of the provision of pharmaceutical products.

Provision of medical products such as clinical thermometers, adhesive and non-adhesive bandages, hypodermic syringes, first-aid kits, hot-water bottles and ice bags, medical hosiery items such as elasticated stockings and knee-pads, pregnancy tests, condoms and other mechanical contraceptive devices;

- Administration, operation or support of the provision of prescribed other medical products.

Provision of therapeutic appliances and equipment such as corrective eyeglasses and contact lenses, hearing aids, glass eyes, artificial limbs and other prosthetic devices, orthopedic braces and supports, orthopedic footwear, surgical belts, trusses and supports, neck braces, medical massage equipment and health lamps, powered and unpowered wheelchairs and invalid carriages, "special" beds, crutches, electronic and other devices for monitoring blood pressure, etc.;

- Administration, operation or support of the provision of prescribed therapeutic appliances and equipment.
- Includes: dentures but not fitting costs; repair of therapeutic appliances and equipment.

Excludes: hire of therapeutic equipment (222).

Sub-sector 222 - Outpatient services

This group covers medical, dental and paramedical services delivered to outpatients by medical, dental and paramedical practitioners and auxiliaries. The services may be delivered at home, in individual or group consulting facilities, dispensaries or the outpatient clinics of hospitals and the like.

- Outpatient services include the medicaments, prostheses, medical appliances and equipment and other health-related products supplied directly to outpatients by medical, dental and paramedical practitioners and auxiliaries.
- Medical, dental and paramedical services provided to in-patients by hospitals and the like are included in hospital services (223).

This sub-sector covers the services provided by general medical clinics and general medical practitioners. General medical clinics are defined as institutions which chiefly provide outpatient services which are not limited to a particular medical specialty and which are chiefly delivered by qualified medical doctors. General medical practitioners do not specialize in a particular medical specialty.

- Provision of general medical services;

- Administration, inspection, operation or support of general medical services delivered by general medical clinics and general medical practitioners.

This sub-sector covers the services of specialized medical clinics and specialist medical practitioners. Specialized medical clinics and specialist medical practitioners differ from general medical clinics and general medical practitioners in that their services are limited to treatment of a particular condition, disease, medical procedure or class of patient.

- Provision of specialized medical services;
- Administration, inspection, operation or support of specialized medical services delivered by specialized medical clinics and specialist medical practitioners.
- Includes: services of orthodontic specialists.

This sub-sector covers the services of general or specialist dental clinics and dentists, oral hygienists or other dental operating auxiliaries. Dental clinics provide outpatient services. They are not necessarily supervised or staffed by dentists; they may be supervised or staffed by oral hygienists or by dental auxiliaries.

- Provision of dental services to outpatients;
- Administration, inspection, operation and support of dental services delivered by general or specialist dental clinics and by dentists, oral hygienists or other dental auxiliaries.
- Includes: fitting costs of dentures.

Provision of paramedical health services to outpatients;

- Administration, inspection, operation or support of health services delivered by clinics supervised by nurses, midwives, physiotherapists, occupational therapists, speech therapists or other paramedical personnel and of health services delivered by nurses, midwives and paramedical personnel in non-consulting rooms, in patients' homes or other non-medical institutions.
- Includes: acupuncturists, chiropodists, chiropractors, optometrists, practitioners of traditional medicine, etc.; medical analysis laboratories and x-ray centers; hire of therapeutic equipment; medically prescribed corrective-gymnastic therapy; outpatient thermal bath or sea-water treatments; ambulance services other than ambulance services operated by hospitals.

Excludes: dentures (221); public health service laboratories (224); laboratories engaged in determining the causes of disease (225).

Sub-sector 223 - Hospital services

Hospitalization is defined as occurring when a patient is accommodated in a hospital for the duration of the treatment. Hospital day-care and home-based hospital treatment are included, as are hospices for terminally ill persons.

- This group covers the services of general and specialist hospitals, the services of medical centers, maternity centers, nursing homes and convalescent homes which chiefly provide in-patient services, the services of military base hospitals, the services of institutions serving old people in which medical monitoring is an essential component and the services of rehabilitation centers providing in-patient health care and rehabilitative therapy where the objective is to treat the patient rather than to provide long-term support.
- Hospitals are defined as institutions which offer in-patient care under direct supervision of qualified medical doctors. Medical centers, maternity centers, nursing homes and convalescent homes also provide in-patient care but their services are supervised and frequently delivered by staff of lower qualification than medical doctors.
- The group does not cover facilities such as military field hospitals (121), surgeries, clinics and dispensaries devoted exclusively to outpatient care (222), institutions for disabled persons and rehabilitation centers providing primarily long-term support (281), retirement homes for elderly persons (282). Neither does it cover payments to patients for loss of income due to hospitalization (281).
- Hospital services include medicaments, prostheses, medical appliances and equipment and other health-related products supplied to hospital patients. It also includes non-medical expenditure of hospitals on administration, non-medical staff, food and drink, accommodation (including staff accommodation), etc.

Provision of general hospital services;

- Administration, inspection, operation or support of hospitals that do not limit their services to a particular medical specialty.

Specialized hospitals differ from general hospitals in that their services are limited to treatment of a particular condition, disease, or class of patient, for example, diseases of the chest and tuberculosis, leprosy, cancer, otorhinolaryngology, psychiatry, obstetrics, pediatrics and so forth.

- Provision of specialized hospital services;
- Administration, inspection, operation or support of hospitals that limit their services to a particular medical specialty.

Provision of medical and maternity center services;

- Administration, inspection, operation or support of medical and maternity center services.

Nursing and convalescent homes provide in-patient services to persons recovering from surgery or a debilitating disease or condition that requires chiefly monitoring and administering of medicaments, physiotherapy and training to compensate for loss of function or rest.

- Provision of nursing and convalescent home services;
- Administration, inspection, operation or support of nursing and convalescent home services.

- Includes: institutions serving old people in which medical monitoring is an essential component; rehabilitation centers providing in-patient health care and rehabilitative therapy where the objective is to treat the patient rather than to provide long-term support.

Sub-sector 224 - Public health services

Provision of public health services;

- Administration, inspection, operation or support of public health services such as blood-bank operation (collecting, processing, storing, shipping), disease detection (cancer, tuberculosis, venereal disease), prevention (immunization, inoculation), monitoring (infant nutrition, child health), epidemiological data collection, family planning services and so forth;
- Preparation and dissemination of information on public health matters.
- Includes: public health services delivered by special teams to groups of clients, most of whom are in good health, at workplaces, schools or other non-medical settings; public health services not connected with a hospital, clinic or practitioner; public health services not delivered by medically qualified doctors; public health service laboratories.

Excludes: medical analysis laboratories (222); laboratories engaged in determining the causes of disease (225).

Sub-sector 225 - R&D Health

Administration and operation of government agencies engaged in applied research and experimental development related to health;

- Grants, loans and subsidies to support applied research and experimental development related to health undertaken by non-government bodies such as research institutes and universities.

Includes: laboratories engaged in determining the causes of disease.

Excludes: basic research (104).

Sub-sector 226 – Health Insurance

Added by NEDA. Description to be added.

Sub-sector 227 - Health n.e.c.

Administration, operation or support of activities such as formulation, administration, coordination and monitoring of overall health policies, plans, programmes and budgets; preparation and enforcement of legislation and standards for the provision of health services, including the licensing of medical establishments and medical and paramedical personnel;

production and dissemination of general information, technical documentation and statistics on health.

- Includes: health affairs and services that cannot be assigned to (221), (222), (223), (224) or (225).

Note: n.e.c. is Not Elsewhere Classified

Sector 240 – Recreation and culture

Government outlays on recreation, culture and religion include expenditures on services provided to individual persons and households and expenditures on services provided on a collective basis. Individual expenditures are allocated to groups (241) and (242); expenditures on collective services are assigned to groups (243) to (246).

Collective services are provided to the community as a whole. They include activities such as formulation and administration of government policy; formulation and enforcement of legislation and standards for providing recreational and cultural services; and applied research and experimental development into recreational, cultural and religious affairs and services.
